Dear Sir,

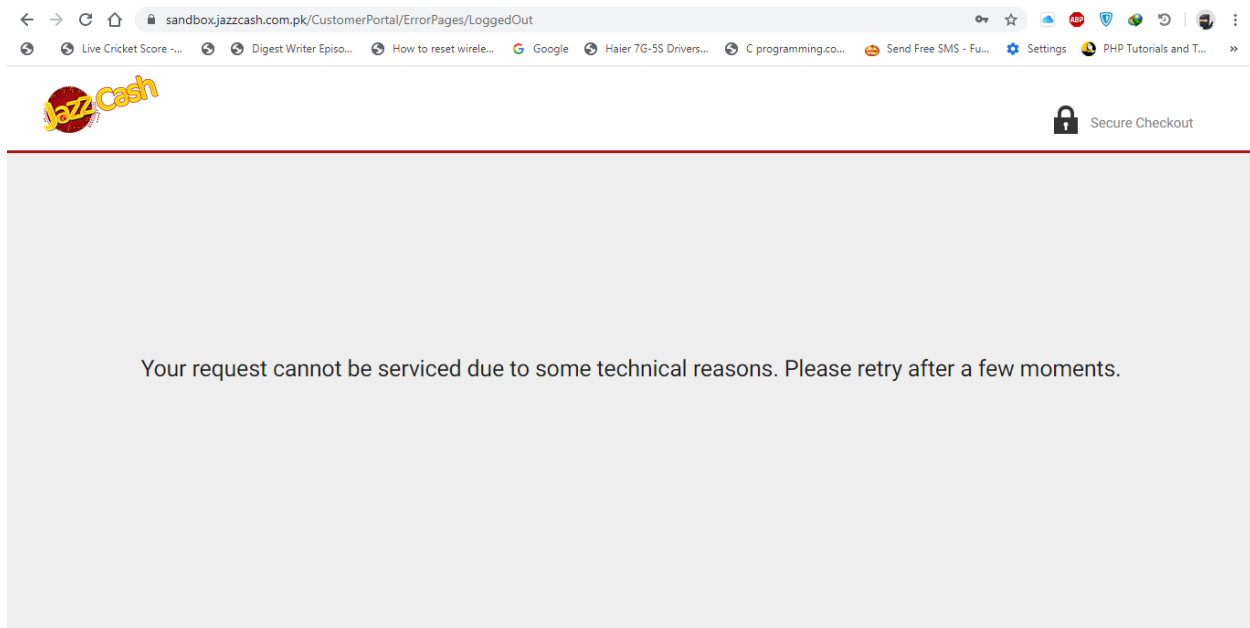

As per provided guideline I followed all steps, I signed up in JazzCash URL: <https://sandbox.jazzcash.com.pk/> with email ID saadbhatti001@gmail.com (you can check in your system).

Description:

I tried to implement with two ways, first one was **HTTP POST - Page Redirect (v1.1,v2.0)** and other one was **Hosted Payment Checkout (v1.1,v2.0)**.

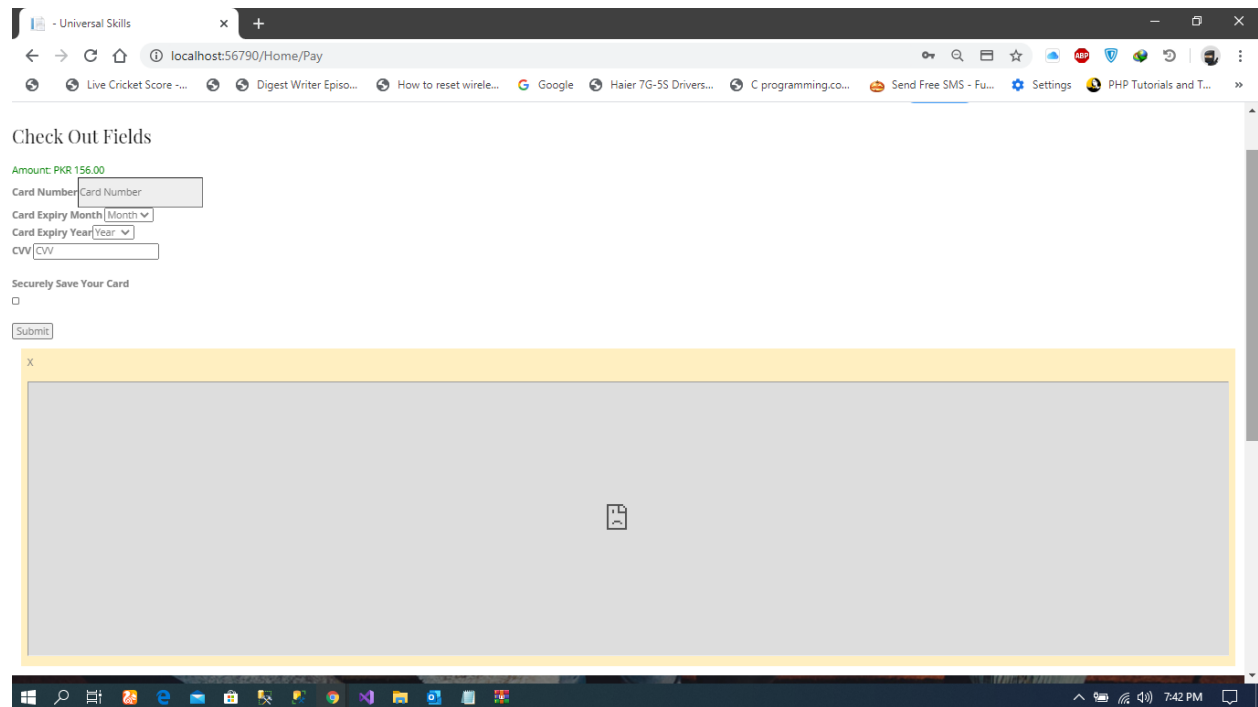

(Way - I)

When I implemented first way **HTTP POST - Page Redirect (v1.1,v2.0)** and I used provided debit card (i.e 5123456789012346) information on screen which I integrated in my project then I got following error when I clicked on PAY button.

(Way – II)

Hosted Payment Checkout (v1.1,v2.0). I got following error: please see in lower portion screenshot nothing is being shown.

Acquiring:

It is stated that, we have tried our best to integrate payment gateway but unfortunately we did not achieve our task.

It is requested you please guide us in detail if you have proper document or a video on integration so please provide us, treat us step by step.

Regards:

Technical Team
